Munnaluri Rishikesh

Bengaluru, Karnataka, India | rishikeshjonin@gmail.com | +91 9059076106 | LinkedIn | GitHub | Portfolio

Professional Summary

AI/ML-focused Computer Science undergraduate building applied systems across **Large Language Models, RAG, Agentic AI, Machine Learning, Computer Vision, and Speech AI**. Experienced in developing end-to-end AI applications using Python, FastAPI, scikit-learn, vector search, PostgreSQL, and modern LLM tooling.

Education

RV University, Bengaluru — Aug 2023 – Jul 2027
B.Tech (Hons) in Computer Science and Engineering – Artificial Intelligence & Machine Learning
CGPA: 7.9/10

Technical Skills

AI / Machine Learning: Python, scikit-learn, XGBoost, LightGBM, TensorFlow, Pandas, NumPy, Classification, Regression, Model Evaluation, Computer Vision

Generative AI & Agentic Systems: LLMs, RAG, Embeddings, Vector Search, AI Agents, Tool Calling, Prompt Engineering, LLM Evaluation

Languages: Python, Java, TypeScript, JavaScript, SQL, C++

Backend & Databases: FastAPI, REST APIs, GraphQL, PostgreSQL, Supabase, Redis, Celery

Web & Real-Time: React, Next.js, LiveKit, WebRTC, Supabase Realtime

Developer Tools: Docker, Git, GitHub, GitHub Actions, CI/CD, Vercel, Linux/Bash

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Projects

AI Knowledge & Research OS — RAG-Powered Research Platform — Live
Next.js, TypeScript, PostgreSQL, Supabase, pgvector, Gemini, RAG, Embeddings

- Built an evidence-first AI research workspace that ingests private documents, generates embeddings, performs semantic vector retrieval, and produces grounded LLM answers with traceable citations to original sources.

ReturnReview — Computer Vision & LLM Return Inspection System — GitHub | Live
Python, FastAPI, YOLO Segmentation, OpenCLIP, Gemini, Next.js, PostgreSQL

- Built a pilot-stage evidence-based return inspection system combining damage localization, category verification, few-shot defect recognition, policy retrieval, grounded LLM review generation, and human-in-the-loop review.

CommercialIQ — AI-Powered Commercial Decision Intelligence — GitHub | Live
Python, scikit-learn, React, PostgreSQL, Forecasting, K-Means, RAG, AI Agents

- Built an applied AI platform combining demand forecasting, customer segmentation, predictive risk modeling, model evaluation, RAG, and tool-using AI agents to transform commercial data into actionable decision support.

NoCodeML — End-to-End No-Code Machine Learning Platform — GitHub
Python, FastAPI, React, scikit-learn, XGBoost, LightGBM, PostgreSQL, Redis, Celery, Docker

- Built a no-code ML platform for dataset preprocessing, classification and regression model training, model comparison, evaluation, and prediction, with asynchronous training workflows using Celery and Redis.

Skylark Command — AI Decision Intelligence Platform — GitHub | Live
Next.js, TypeScript, PostgreSQL, GraphQL, Supabase, Gemini

- Built an AI-powered decision intelligence platform for business and operational data, combining deterministic analytics with Gemini-based interpretation, structured insights, and Customer 360 workflows.

Socio Drift — Generative AI Music Platform — GitHub
Python, LSTM, Transformers, Gemini, Generative AI

- Developed an AI-powered music generation platform using LSTM and Transformer-based models with Gemini integration to generate customized music from user prompts based on mood, genre, tempo, and instruments.

EchoType — Multilingual AI Voice & Dictation Platform — GitHub
Python, Local ASR, Speech Recognition, Real-Time Audio, AI

- Built a privacy-first multilingual voice-typing application using local speech recognition and real-time audio processing, with responsive transcription and reliability improvements for latency-sensitive inference.

Axiom Imaging — Medical Imaging & DICOM Operations Platform — GitHub
C++20, Python, FastAPI, Next.js, PostgreSQL, Orthanc, DICOM, Docker

- Built a medical imaging operations platform with DICOM ingestion, Orthanc PACS, PostgreSQL and OHIF, including quality checks, duplicate protection, priority scheduling, and a multithreaded C++20 device engine.

Imposter X — Real-Time Multiplayer Voice/Video Platform GitHub | Live

JavaScript, PostgreSQL, Supabase, Supabase Realtime, LiveKit, WebRTC

- Built a real-time multiplayer platform for 3–12 players with synchronized game state, voting, scoring, chat, and low-latency voice/video communication using Supabase Realtime and LiveKit/WebRTC.

Experience

Assistant Teaching Faculty Intern — RICON Technologies, Nellore, India May 2026 – Jul 2026

- Assisted C and Python theory/lab sessions, prepared and tested programming exercises, and mentored students in debugging, problem solving, and core programming concepts.

Machine Learning / Cybersecurity Intern — Dhee Data Center, Bengaluru, India Jun 2024 – Jul 2024

- Developed a Python-based machine learning malware detection system to classify malicious and benign files using static executable features such as file size, API calls, permissions, and executable characteristics.
- Performed dataset preprocessing, feature engineering, model training, and evaluation for automated malware classification.

Achievements & Certifications

Karnataka Elevate 2025 Finalist — Co-Founder, Mew Thetis; selected as a finalist for government startup funding for *Socio Drift*.

Certifications: Data Structures & Algorithms — CAT Computer Point, Grade A (2026)
|
Containers, Kubernetes & OpenShift V2 — IBM SkillsBuild
